

11 May 2022

Dear H&P resident family members

Our number one priority is the safety and well-being of our residents and staff.

Hall & Prior is very proud of our Influenza vaccination program that we have encouraged for our staff and residents for over ten years. Current WA Health Directions make it a mandatory requirement for all staff, contractors and visitors of residential aged care facilities to have an up-to-date influenza vaccination. The Direction is available [here](#).

We are currently rolling out our 2022 influenza vaccination program for staff in all our Homes in WA. We will have the majority of our staff vaccinated by 16 May and will have all staff vaccinated by 1 June 2022. Residents are also being supported to have their vaccination by their General Practitioner.

We strongly recommend that anyone entering our Homes receive their 2022 influenza vaccination as soon as possible. From 1 June 2022, it will be a mandatory requirement for all staff, visitors and contractors entering our Homes to provide evidence of a 2022 influenza vaccination.

This is a vitally important program to protect our staff and residents and we thank you for your support.

Due to the increase of COVID in the community we are asking you to remain vigilant. Staff, visitors and contractors will still be required to conduct a Rapid Antigen Test before entering the Home, we would also prefer visits to be conducted in resident's rooms or in non-communal areas. Restricting some of our large group activities will also provide us with another level of protection against COVID-19 and protect our most vulnerable in the community.

If you have any questions regarding your loved one or require further information please do not hesitate to contact the Home.

We are all in this together against COVID-19.

Yours truly
